

UI Static Mockup – Jujube Group

Main Page:

There is a navigation bar at the top. This has buttons on the left side for actions like checking notifications. The right side contains a drop down menu for Sign-out, Settings, Editing Profile.

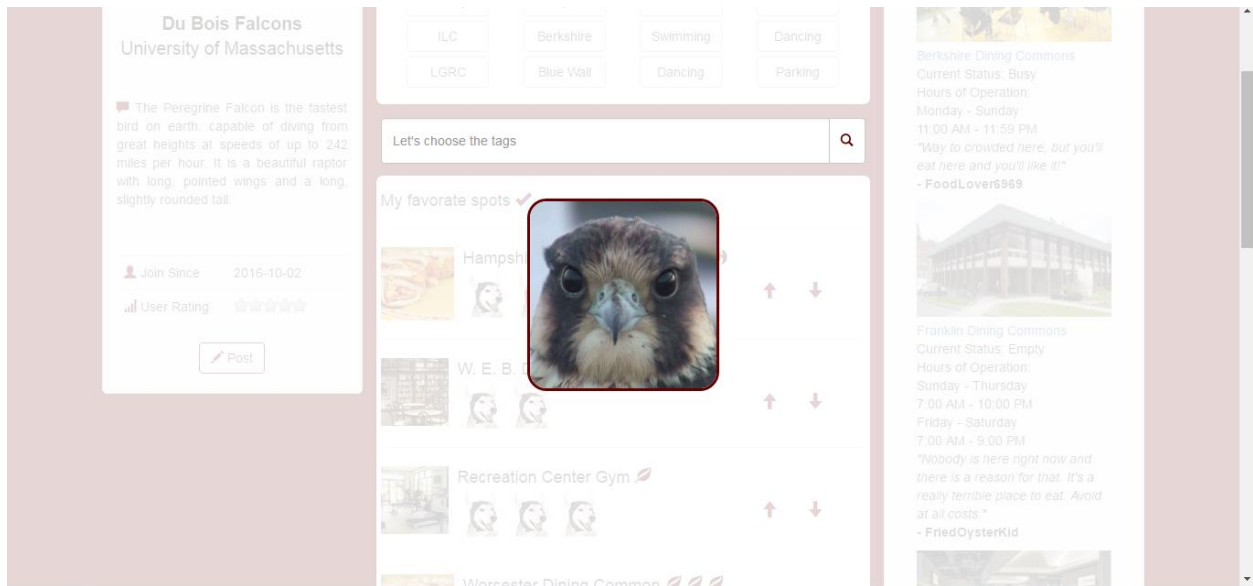

The left menu is for the currently signed-in user's profile. This contains the profile picture, name, a brief bio, date of membership, and user's rating. There is a button "Post" that prompts a pop-up Post menu (shown below). You can also click on the Profile Picture for a larger pop-up version (shown below).

The middle (main) feed contains a search function that uses tags to search. Common tags are listed and tags can also be typed into the search bar. Below that are links to the user's favorite locations and their current reports. Searching with the search bar will lead to the search results page (shown below).

The right menu at first contains "Top Spots", locations that are most popular, with their info and the most recent report for them. Selecting one of these locations will expand it in the menu (shown below).

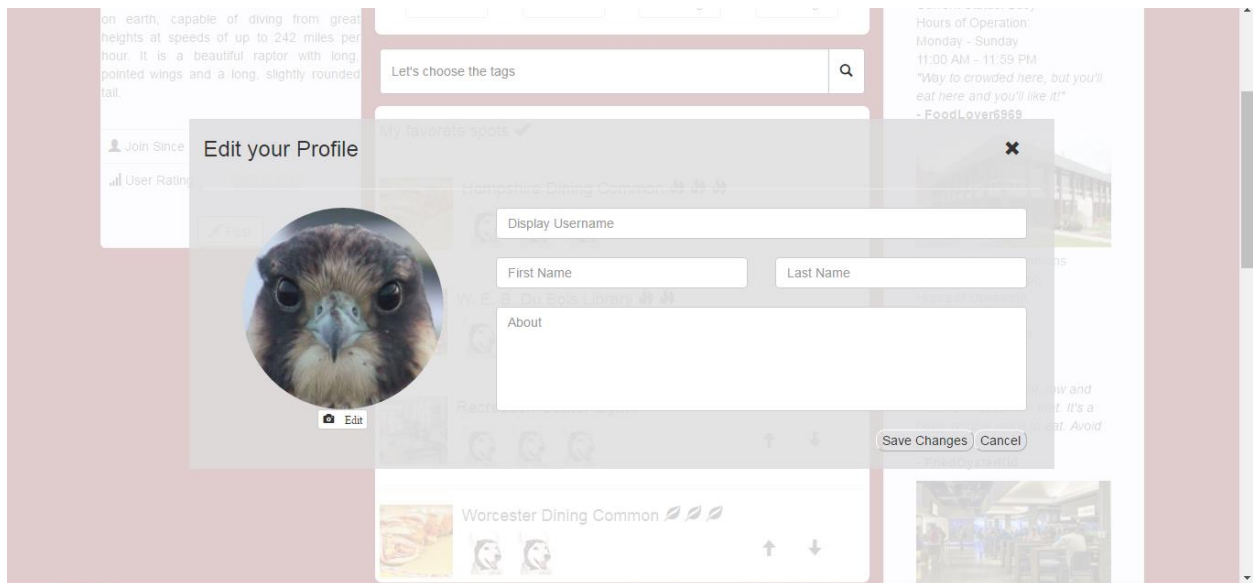

The footer has links to things like social media pages and Privacy Policy.

Profile Picture Pop-up:

This occurs when the user's profile picture is selected.

Edit Profile:

This pop-up menu is presented when "Edit Profile" is selected from the navigation bar's drop down menu. You can change basic information and edit your profile picture. Save Changes and Cancel will both close the window.

Selected Location from Right Menu:

The screenshot displays a web application interface with a dark red header and a light gray sidebar. The main content area is divided into several sections:

- Left Sidebar:** Features a profile for "Du Bois Falcons" at the "University of Massachusetts". It includes a description of the Peregrine Falcon, a "Join Since" date of 2016-10-02, a "User Rating" of 5 stars, and a "Post" button.
- Header:** A dark red banner with the text "Let's check it!" in white.
- Category Grid:** A grid of buttons for "Study", "Food", "Entertainment", and "Social". Under "Study" are "Library", "ILC", and "LGRC". Under "Food" are "Hampshire", "Berkshire", and "Blue Wall". Under "Entertainment" are "Recreation", "Swimming", and "Dancing". Under "Social" are "Coffee", "Dancing", and "Parking".
- Search Bar:** A white input field with the placeholder text "Let's choose the tags" and a magnifying glass icon.
- My favorite spots:** A section showing two locations: "Hampshire Dining Common" (with a photo of food and three dog icons) and "W. E. B. Du Bois Library" (with a photo of a building and two dog icons). Each location has a "11" and up/down arrows for voting.
- Right Sidebar:** Titled "Berkshire Dining Commons", it shows a photo of the dining commons, the current status "Busy", and hours of operation "Monday - Sunday 11:00 AM - 11:59 PM". It includes a quote: "Way to crowded here, but you'll eat here and you'll like it!" by "FoodLover6969". Below this is a "Top User Posts" section with three posts by "FoodLover6969", "RickJames", and "FrankReynolds", each with a profile picture, text, and a "11" with up/down arrows.

The bottom section of the image shows a close-up of the "Top User Posts" section, highlighting the profile pictures and text of the three most recent reports:

- RickJames** - It's straight poppin here. Huge crowds but ya shud come. 11 ↑ ↓
- FrankReynolds** - It was pretty busy there but at least I didn't get robbed. 6 ↑ ↓

A "View More" link is visible at the bottom right of this section.

Berkshire Dining Commons was selected on the right menu and it changes to this. This keeps the location's information and displays the three most recent reports. The reports can be voted on and the user's profiles can be viewed when clicked (shown below). You can also select to "View More".

Search results:

The screenshot shows a web application interface with a top navigation bar containing 'WebApp', 'Home', 'Moments', 'Notifications', and 'Messages'. The main content area is divided into three columns. The left column features a user profile for 'Du Bois Falcons' from the 'University of Massachusetts', including a profile picture of a falcon, a bio about the peregrine falcon, join date (2016-10-02), a 5-star user rating, and a 'Post' button. The middle column displays search results for 'UMass dining', showing four dining commons: Berkshire, Worcester, Franklin, and Hampshire. Each result includes a placeholder image, name, location, and a brief description. The right column, titled 'Top Spots', shows two featured dining commons with photos, names, current status, hours of operation, and user comments.

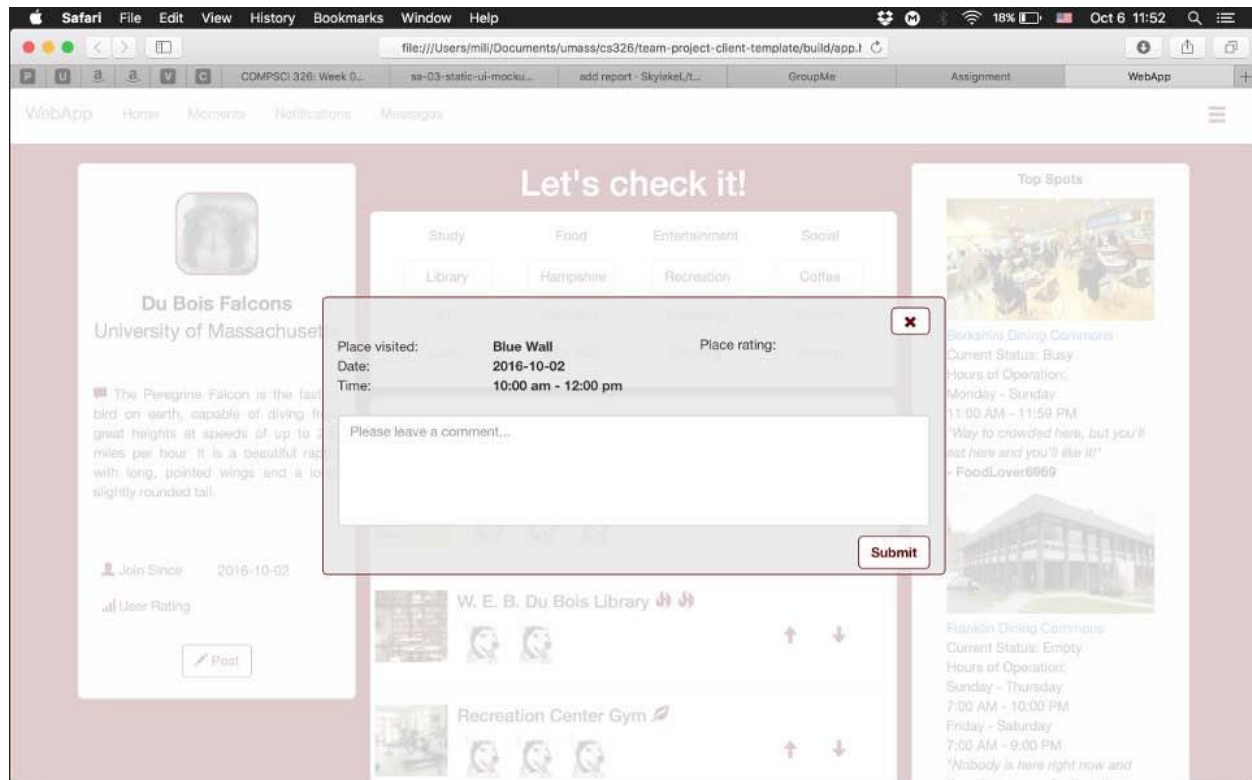

This page results when a search is done in the search module on the Main Page. Results display with name, image, and information. Selecting a location will bring you to its page.

Other User's Profile:

The screenshot shows a user profile pop-up for 'Frank Reynolds'. The pop-up includes a profile picture of an older man with glasses, a bio about the peregrine falcon, join date (2016-10-02), a 5-star user rating, and a 'Favorite' location (Berkshire DC). A 'Report' button is visible in the bottom right corner. The background shows a blurred view of the application's main interface, including a search bar, a list of 'My favorite spots' with images and ratings, and a 'Top User Posts' section with user comments and up/down vote arrows.

This pop-up occurs when you select the username of another user. This has all of their information and an opportunity to report them for inappropriate behavior on the application.

Post pop-up:

This is prompted by the “Post” button in a User’s Profile on the Left Side Menu. Here the user can enter a rating for the location they are at and a comment. Submit will post this to the location’s feed.

Group contribution

Michael White: Other user’s profile pop-up in userProfileClicked.html and userProfileClicked.css and Written Report.

Andrew Murchinson: Right side menu with “Top Spots” and the updated right side menu with reports when a location is selected (previewUserPosts.html/.css).

Mi Li: Left side menu including profile picture with pop-up ability, Post pop-up menu that results from pressing “Post”, and a working Submit button on the Post pop-up menu (btnPostClickedPage.html/.css, btnSubmitClickedPage.html/.css, and userPicClickedPage.html/.css).

Chia-Lei Lee: Edit profile pop-up (editProfileScreen.html/.css) and drop down menu in navigation bar.

Shiyan Yin: The navigation bar, the footer, and Main Feed (Formatted search module in feed and created My Favorite Spots feed)

Hoang Nguyen: Search module seen on main feed (searchmodule.html/.css) and Search Results page (searchresult.html/.css).
